

How to...

begin pioneering!

Session Ideas

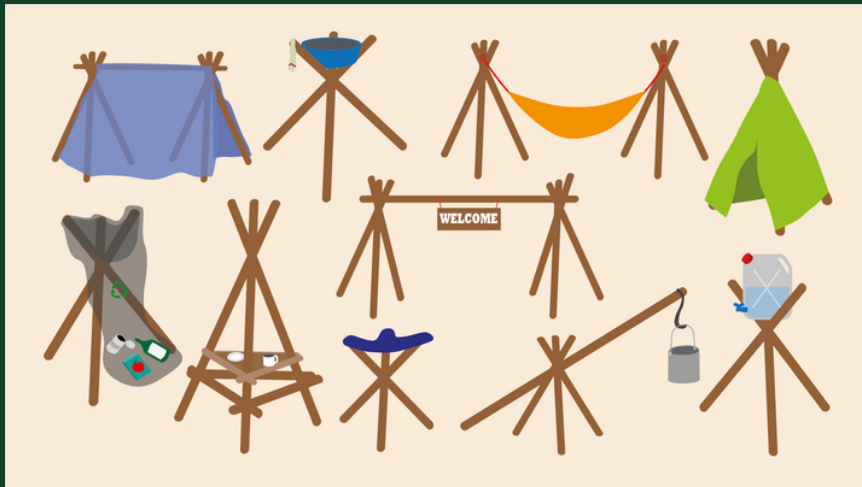

Tripod Camp Gadgets

Ideas

After assembling your tripod, you can create many camp gadgets. Get creative & be resourceful!

- Bowl holder
- Tripod to cook over a fire
- Washing line
- Shelter structure
- Camp table or bench

Islamic Principle

Discuss with the Young People that all resources available to us are potentially at our service, including rope. It's up to us to use it for our benefit and the benefit of others

“The best of people are those that bring most benefit to the rest of mankind” (Sahih al-Bukhari)

What could we build to benefit those around us?

- shoe shelf
- camp bench

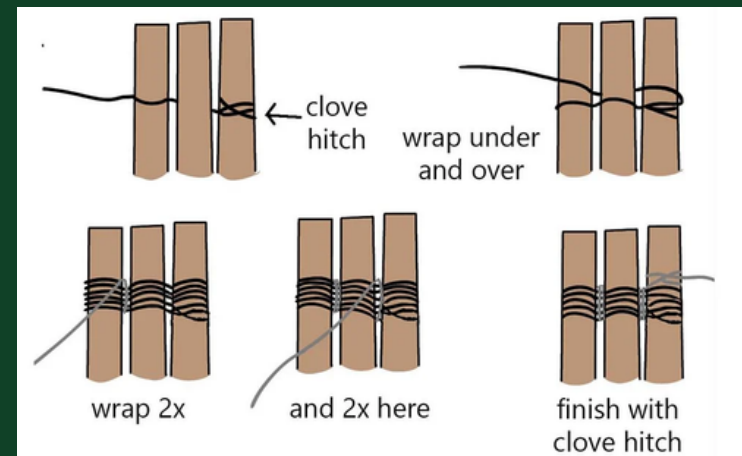

Tripod Lashing

Step by Step Guide

1. Lie the three poles alongside each other
2. Tie a clove hitch around one of the outside poles
3. Wrap about six racking turns around the poles. The rope should weave in and out between them like extended figures of eight
4. Make two or three frapping turns around the racking between the spars. Frapping turns wrap around a lashing at a right angle to make it tighter. There should be two or three turns between the first and second pole, and another two or three turns between the second and third pole
5. Finish with another clove hitch
6. Cross both outside spars to make a tripod

Square Lashing

Step by Step Guide

- Tie a Clove Hitch on the vertical pole
- Begin the lashing of the two poles together by twisting the short end from the clove hitch around long end of the rope
- Then wrap the rope over the front of the horizontal pole then around the back side of the vertical pole and over the front of the horizontal piece
- Continue around the back side of the vertical pole, the front of the horizontal and back side of the vertical and front of the horizontal
- Continue with this wrapping, alternately going over and under each pole for three turns
- Tighten your wraps down by making two or more "frapping turns" around the ropes
- Finish the knot by making two or more half hitches next to the original wraps
